

The foreign language lab is one of the most modern in the state of Texas.

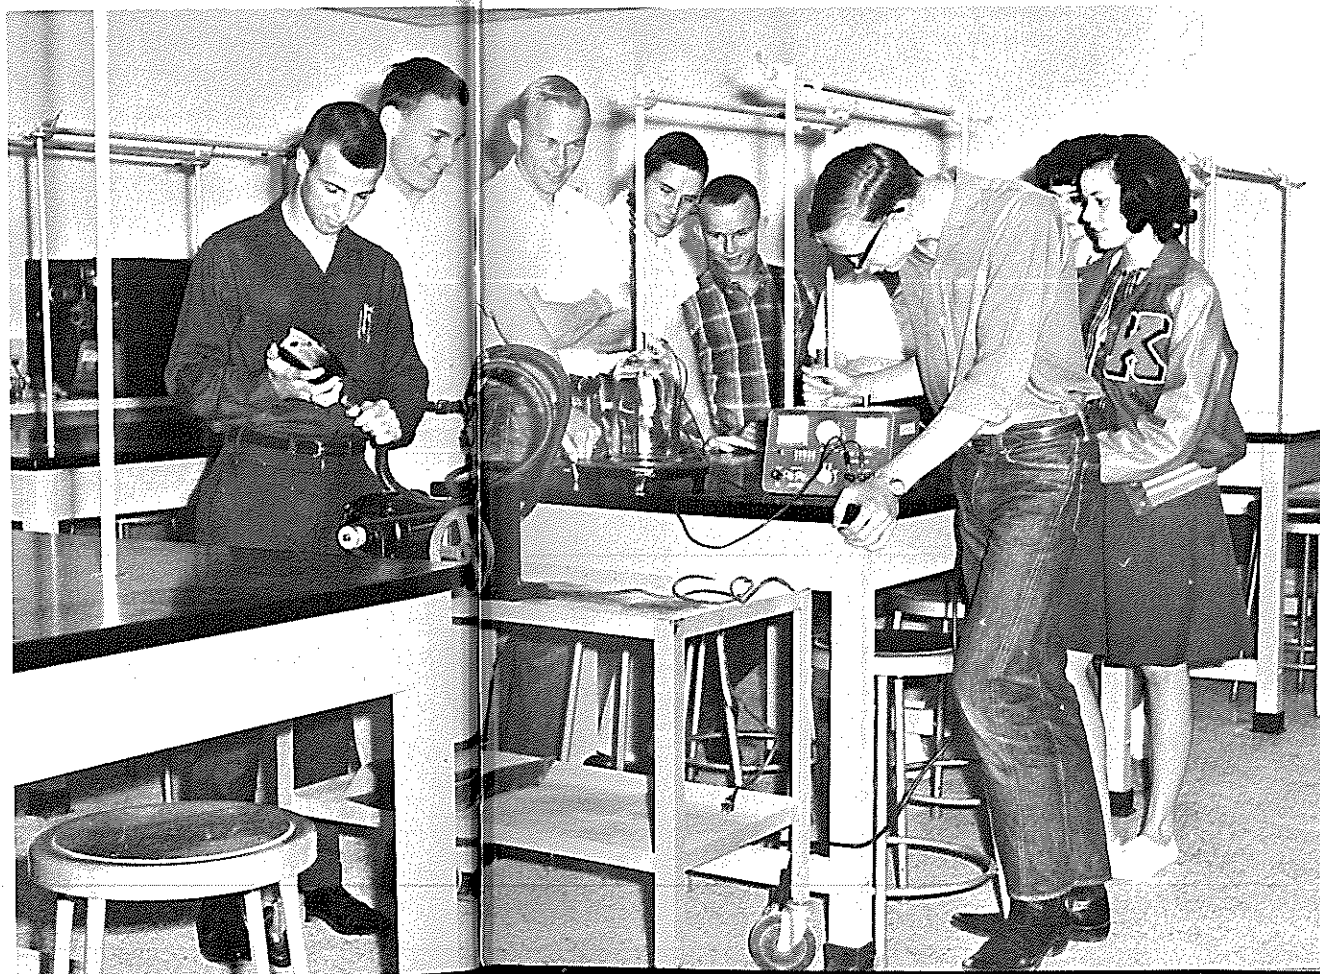

Mr. Burson teaches plane geometry in the new math room.

## New Wing

## Greets Record Enrollment

Physics students make good use of the new equipment.

On September 2, 1964, a record enrollment of 743 students was introduced to a new wing containing a gym, five math rooms, four laboratories and three foreign language rooms.

Later in the year additional improvements were made to keep the facilities at KHS in stride with the pace of progress. Air conditioners were installed in each room and the library was carpeted.
