

Mr. Still answers questions about Algebra during class period.

Debra Speegle and Darrell Springer view one-celled animals through microscope in Biology.

Gregory Nelson attempts to explain

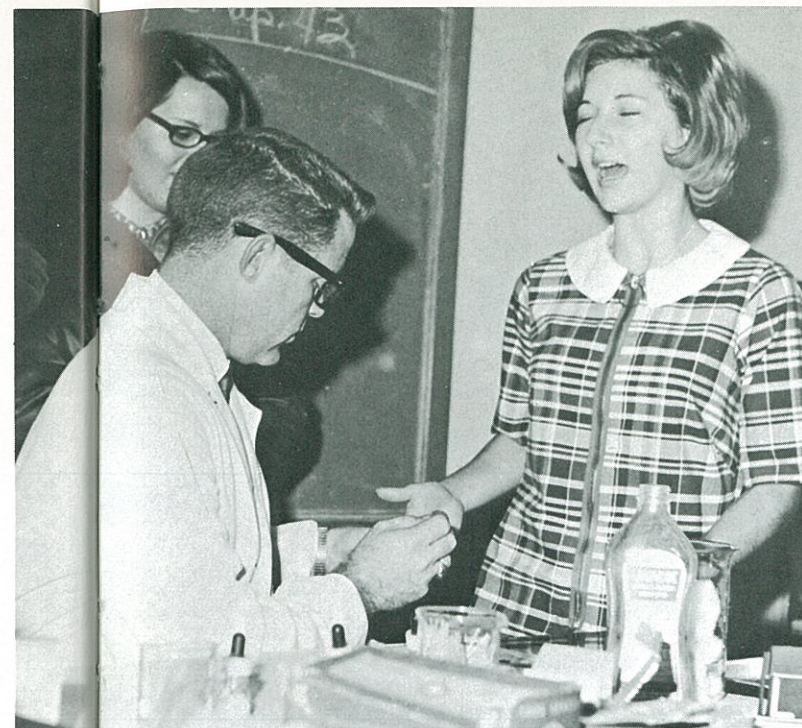

math problem.

## Adventure in Math and Science

Kermit High School has a wide variety of Math and Science courses to offer. Included in the Science courses are General Science, Biology, Chemistry, and Physics. General Science reinforces and adds to the principles acquired in earlier science courses. Biology concerns the study of living things. Chemistry is a physical science while Physics is an exact science.

The courses offered in Math are Related Math I, Related Math II, Algebra I, Algebra II, Geometry, Trigonometry, and Elementary Analysis.

OUCH!! That hurts!

"This frog sure is messy," says Cheryl Hodges.
