The juniors also play the game by finally getting a chance to participate in events such as the Junior-Senior play and being able to have a say in the decoration and planning of the prom.

Another big part of being a junior is getting ready to be a senior. The ordering of senior rings made every junior feel proud and want to show off his or her ring. The coming of the rings had the whole Junior class buzzing with excitement.

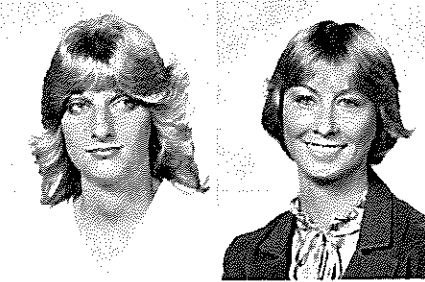

Many juniors play the game by being able to participate in many varsity sports and U.I.L. competition.

Simply knowing that the time is almost there for graduation and for starting out on a life of their own makes the juniors a very excited and fun group of people.

The juniors also have to start looking for a future plan. Whether it's going to college or not, the junior year is a very important and fun year.
