Did You Order Your Class Ring?

The ordering of Senior Rings was a major event for the Juniors this year. Everybody was excited and proud of their flashy rings. We asked some Juniors questions about their rings. On question was, what did their ring symbolize? The second one was why did they order their ring? Some of the Juniors added extra comments of their own.

"Yes, I did order a Senior Ring, the main reason was because everybody else did and I guess something to have and show after I graduate. The ring means so much to me, it represents that I was a part of something, and it shows my pride in being a Yellow Jacket," said Joe Lujan.

"It means that I'm finally getting out of school and on with a lot of better things in the future. I bought it mainly because it means a lot to a person when you finally can wear one of your own," Ernie Pryor said.

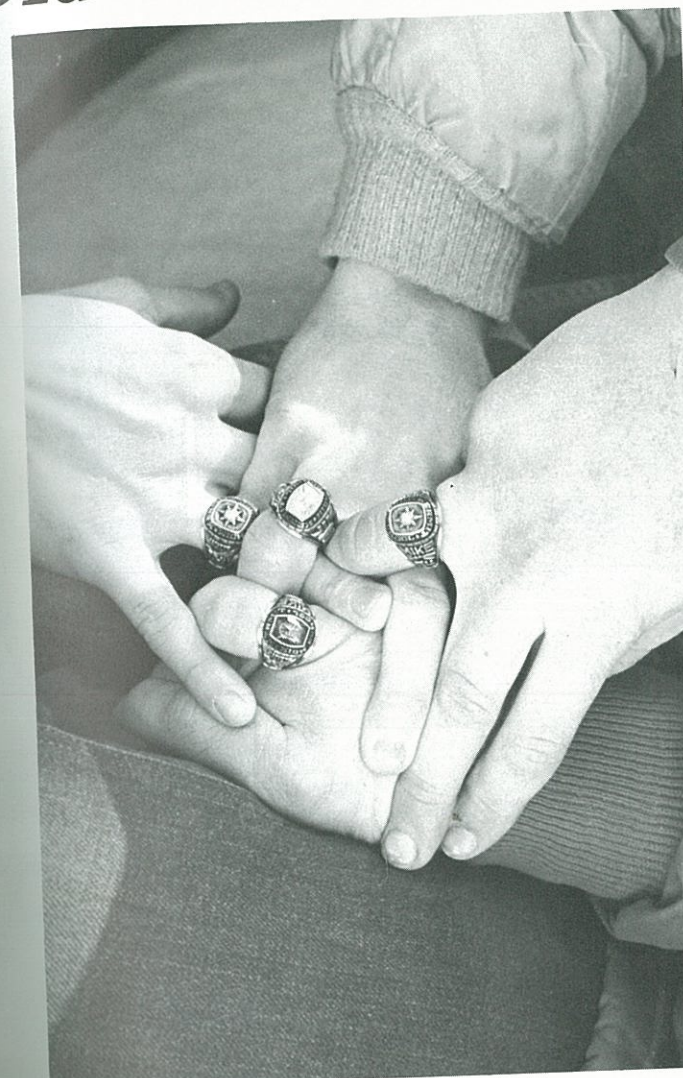

"I like my class ring because it shows the year one graduates and gives something to show your seniority in school. My ring has a special meaning in that in the future I will be able to look back and remember the special memories I have had with my friends. I hope the future students of KHS find their ring as special as many others have theirs," said Agmed Ramirez.

"The class ring means remembering hard work, and even good times. I bought it to remember some good times and bad times and to show achievement," Denel (Big Mac) McIntire said.

"It means I finally got to the twelfth grade and I bought it because I wanted to," said Melinda Cardona.

"It signifies three years of hard work and a few easy ones. I bought it to remember old times and some good times and even bad times," Omar Hernandez said.

"I like my class ring because it's a little different from the other ones and in that, it holds memories of the four years I've been in High School, and those special little things we do are brought back to me when I look at my ring. I bought my class ring so I would have something to look back on to bring up those things we did when we were in Kermit High School," said Albert Lujan.

Patricia Couey and other members of the 1982-83 Junior Class waited anxiously for the day to arrive ... and finally the day and their Senior Rings came in. Jostens' representative Jerry Kight (left) assisted students in making their ring selections.
