

John McCune
Physics, F.O.M.,
Int. Alg., Trig.

Senior Kip Brewer and other members of the physics class appear to be totally engrossed in the current topic.

Robert (Scooter) McKenzie gets a little explanation from Mr. John McCune during algebra.

One of the more interesting laboratory tasks for the physics class was the construction of the Tesla Coil. Shown (l-r) are Robert Boring, Mr. John McCune, Kip Brewer, Nathan Wight and David Hornberger.

Staff Creates 1985 'Sandstorm'

Always ready for a laugh or a smile are the yearbook staff, shown here on the playground equipment, of all things. Members of the staff include: Wanda McMillian, Stacey Long, Skye Moble, Lisa Patterson, Marina Jackson, Sandi Fullen, Edna Pando, T.J. Thomas, Leslie Loughmiller, Kathy Livingston, and Teresa Lee.

Skye Moble seems more interested in what the photographer is doing than what editor Lisa Patterson is telling her.

Stacey Long is busy at work trying to identify the students for her section in the annual.
