# BOARD OF EDUCATION

## SUPERINTENDENT'S MESSAGE

Your school is an agency for the training of minds and the dissemination of knowledge. The union of the trained mind and knowledge makes scholarship. The quest for truth requires of one to look deeply into every subject. As we learn so shall we live.

The educative process develops an enriched sense of values, finer appreciations, socialized attitudes and behavior. This enrichment develops a growing consciousness of responsibility in matters affecting the welfare and happiness of others and by increasing skill in attacking and solving problems of living effectively. To realize the above outcomes of the educative process it is necessary that you give your best. Never be satisfied to do the little thing. I admonish you to do your best and I confidently feel that only your best will satisfy.
