

Physical Education - Two years of Physical Education are required of every student. The girls' activities include archery, tennis, soccer, volleyball, baseball, table tennis, shuffleboard, tumbling, hiking, and folk dancing.

Chemistry - Chemistry, biology, and general science are offered one year; physics is offered instead of chemistry the following year. This is a laboratory period in a Chemistry class. These students learn science through actual tests and experiments.

Home Economics - Three years of Home Economics are offered. One half of the year is devoted to foods, and the other to clothing. This group entertains with formal teas, luncheons, and formal dinners.

Journalism - These students of journalism work in perfect harmony and jolly good spirit as they go about the writing and editing of their publication, "The Whirlwind."

Home Economics - The clothing department has an annual style show, special exhibits, a trip to the convention each year, and some mighty pretty clothes to wear.

Visual Education - Visual Education plays an important part in one's education. This is an American History class seeing some of the facts that they study about in books.
