

An Art Class

Our art department is still young, yet it is definitely growing. Our students find the art course to be functional, beautiful, and inspirational.

Library

Study Hall

The high school library, the study center of our school, is composed of approximately 4,000 volumes. Here the students secure information in preparing their assignments in all courses. Not only do we have an excellent reference and fiction library, but we receive a about thirty-five monthly magazines for the education and pleasure of our students. A new feature added this year is a vertical file of clippings and pictures which may aid students in their pursuit of current problems.

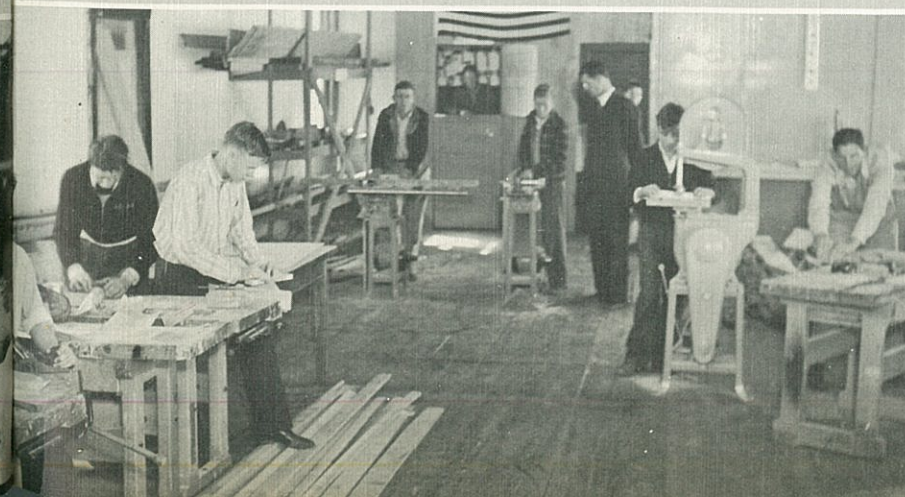

Viola Bayless, B.S.  
Librarian

The work shop is a buzzing, bustling place of working students. By learning this type of work, students are often able to secure a job without taking further training.
