AT WORK

This section features classroom activities. The class activities group themselves according to the four courses offered. The curriculum includes a college preparatory course, a science course, a commercial course, and a general credit course. The above mentioned courses are offered in order to meet individual needs. A student must complete one of the courses before he is permitted to graduate.

Our school is a member of the Southern Association of colleges and secondary schools. We are proud of the fact that the Wink school ranks high among the more progressive schools of Texas.

Below is a picture of our library, a place where "one who seeks may find". Besides many valuable and interesting books, there are current magazines and newspapers for those who care to read them.
