## SUPERINTENDENT'S MESSAGE

The importance of Education today is self evident and the need is greater now than at any other time in history. Our school is an agency for the teaching of minds and the dissemination of knowledge, along with teaching the traits necessary to be a good citizen. As we close another school year, I'm proud to have had a small part in this organization and I hope that you will look back and say that this year was profitable to you in acquiring these characteristics so necessary to meet life.

Frank R. Barton.
