Barton And His Helpers

The Class of 1985 is definitely a group of students that has enjoyed a lot of success. Your success on the athletic field and in the academic competition is something to be cherished. We know that the development of the mind is of utmost importance if we are to be successful in life. We feel very confident that through your work in the classroom and your competition spirit you will be successful in life after high school. My association with you has been an experience that I will always remember.

Frank Barton
