Preparing For High School

This years eighth graders are at the top, they are the seniors of W.J.H.S. They have been preparing for High school for two years now. Eighth graders must now make a transition from different teachers to going up the long flight of stairs everyday. They are at the top now but will soon be at the back of the pack at W.H.S. They must learn to adjust to being around different people. Making this change is not that difficult for them because they are in the same building as the High School and know alor of the teachers and students. They are this year's high school hopefuls.
