

Wink Students
Glow, As They
Show Their Talents

The 1990-91 WINK HIGH SCHOOL students have come along way in showing their skills. If it's not the fashion show or health, it's auto mechanics or woodshop. But all in all they have one thing in common; everyone of these students have a talent in what they do.

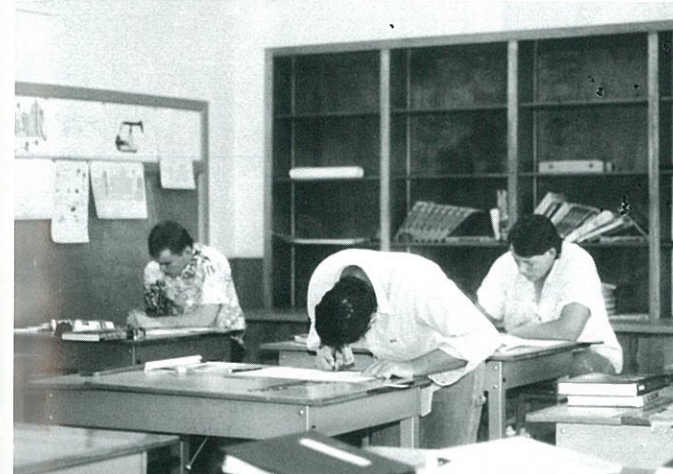

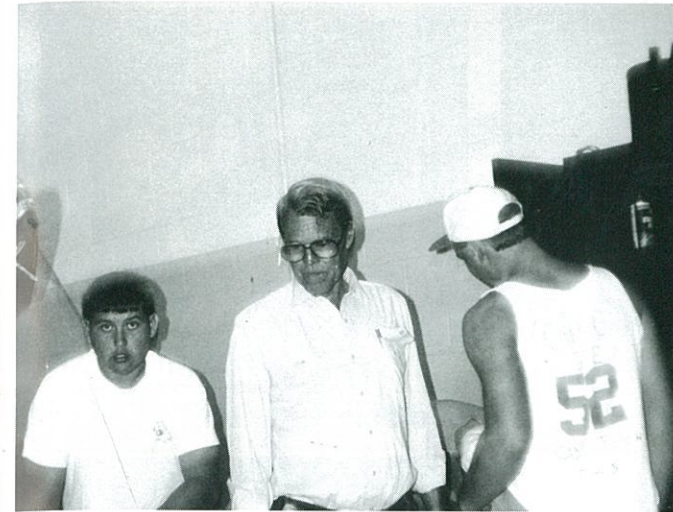

Billy Plunkett models the latest style of McCall's fashion. Here he modeled a kind of "farmer" style over-all.

Look everyone, it's "Mighty Mouse". Manuel tries real hard to hold up the car, while trying to check out a leak in it.

Jessica, Trina, Desiree, Kristi and Angie "Strike a Pose," while modeling McCall's latest "60's" fashions.

Mr. Turnbo and his Auto Mechanics not only help teachers and students, they also help the public. Here, Mr. Turnbo and Manuel help Chad Robinson put oil in his car.

Three men and a little drafting class. Here Richard, Lester, and Chris are working hard on their draft work.

J.R. and A.J. seem to have found something more interesting than listening the Miss Dodd.

Donnie and John spent about three days, making wooden cacti for the Jr. Sr. Prom.

Mrs. Thomas's child development class learned how to care for babies, by spending all week taking care of flour sacks. They dressed them up and gave them names, they also put bandages on them or called the doctor if they were hurt in some way.
