Elementary Teachers Enrich Young Minds

The 1995-96 school year closes out a thirty year teaching career for Mrs. Bobbie Norris, the last thirteen of which have been at Wink Elementary. Mrs. Norris's wide travels and her love of children have been an asset to her students. She is looking forward to retirement but will miss being close to members of her social studies classes. Mrs. Norris said, "Seeing children finally become 'turned-on' about learning has been the most rewarding thing about teaching." Mrs. Norris will be missed by all at Wink Elementary.

Ms. Pam Thompson's science class is a favorite for fourth, fifth, and sixth graders. She strives to connect scientific significance to everyday activities. This helps put science at a level elementary students understand. Ms. Thompson's hands-on approach and cooperative learning activities such as baking bread to study the properties of yeast (as shown here with her fifth grade class) are always a big hit with students.
