Creating the Finished Product

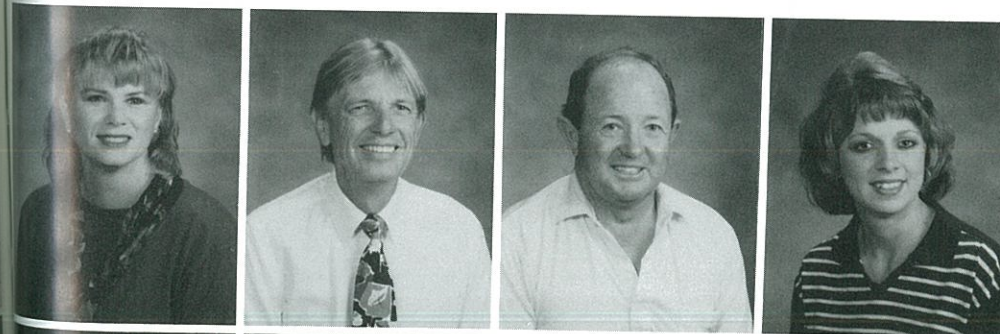

More Than the Three R's

Vocational classes offer great opportunities beyond the basic three R's. In Coach Gary Mossier's auto mechanics and small engine repair classes, students learn to work on transmissions, engines, brake jobs, and other mechanical problems.

"If you want to learn about mechanics, Coach Mossier's classes are the best," says Senior Thomas Gonzales.

Coach Danny Thomas teaches woodshop, welding, and drafting. Projects in his classes include cake covers, bread boxes, and members of his advanced classes make beautiful furniture.

These classes help open doors for future technical careers.
